AP-2 Ultra

Automatic Punch

The AP-2 Ultra Automatic Punch easily handles a wide variety of sheet sizes, punch styles, and paper stocks. Not even tabs slow down the AP-2 Ultra. It can easily punch intermixed index tabs and irregularly-sized covers. Advanced paper handling technology makes feeding coated, laminated, glossy, and heavier stocks trouble free. The electronic control panel enables the user to set the speed for each job and make adjustments for heavily curled stock. Designed for comfort and efficiency, operators load and unload the AP-2 Ultra from the same position.

Die set changes are tool-free and take only seconds. GBC® offers a variety of punch patterns for almost any punching job. Pins remove quickly and easily to support a wide range of paper sizes.

Features and Benefits

- Edge guide adjustment knobs allow effortless sheet changes without tools.
- Ergonomic workflow lets operator load and unload from the same position.
- Convenient user interface controls variable speeds.
- Adjustable pick feeder accommodates various paper stocks.

- Output stacker maintains job collation without a turn-over device.
- Tool-free die set changes take only seconds.
- Available punching die patterns include CombBind®, WireBind, ColorCoil®, 3-hole and more.
