Single Scissor Lifts

Product Code: BZ8130-1P / BZ8130M-1P

Our smallest scissor-action service lift comes in two versions, static and mobile. The mobile version is equipped with two heavy-duty rear castors and a front-end lifting bar to enable quick and easy positioning anywhere in the workshop. The static version is simply fixed to the floor in the required position.

The lifting scissors are supported by a low level cross brace ensuring both platforms are always aligned. Operation is from a single 240V hydraulic control pedestal which can be located anywhere within 3 metres of the platforms. Aimed at tyre shops and workshops with little space, this versatile, compact and simple self-install lift is also popular among home enthusiasts.
