

Le Chameau UK - Warranty Policy

All Le Chameau rubber boots are guaranteed for 2 years against manufacturing defects with a proof or purchase.

This warranty does not cover damage caused by accident, unsuitable use of the product, damage from foreign bodies or fluids, wear and tear, deterioration of colors and materials over time and after prolonged use. However, the zips used by Le Chameau are the best available and will not fail if kept clean and mildly lubricated.

Le Chameau make a range of professional farming, hunting, fishing and sailing boots that are fit for purpose and each model is designed for a particular use.

Riding or driving farm equipment for long periods is not something that the standard range of Le Chameau boots is designed for and imparts more stress on the back and sides of the boots.

It is also important to select the right boot according to its end use, this includes the choice of lining and sole. A neoprene lined boot will cause the foot to sweat during the summer months and consequently reduce the life of the neoprene.

All Le Chameau out soles will wear more rapidly if they are worn on concrete or other hard surfaces.

PLEASE NOTE: Due to the manufacturing process which includes vulcanisation it is not possible to repair and re-vulcanise any rubber boots, this includes repairing moving parts such as zips, straps and sole.
