# cuttingstation™

The unique multi-purpose material cutting station, designed to reduce dust, reduce noise and increase safety

The Armorgard CuttingStation™ is a unique purpose-built work station for cutting lengths of metal, such as conduit, cable tray and pipe. Integral health and safety features include fire-rated sound deadening foam to reduce noise pollution, and PVC screens to contain and protect from sparks. The chop saw is positioned on a rubber mat to reduce vibration, while the innovative design allows the chop saw to be positioned at a safe working height, minimising risk of accident or injury. The unit can easily be fitted with a dust extraction, or air filtration system to further enhance the health and safety features to protect the operative of the chop saw, as well as those working in the surroundings.
