PARTNERSHIP WITH
THE ENERGY EXPERTS**

FEEL CONNECTED

WELCOME TO FLOGAS

We have 30 years' experience providing alternative energy solutions to domestic and commercial customers in the UK. From liquefied petroleum gas (LPG) supply to cutting-edge solar PV, solar thermal, ground source heat pumps and biomass solutions – we deliver projects and services that are reliable and expertly managed.

If you're in the construction and development industry, you'll want an energy solution that's cost effective and at the cutting edge of alternative energy technology. Our LPG and renewable energy systems are exactly that. They're also better for the environment than oil-fuelled systems. Which is a great selling point for end users.

If you choose Flogas, we'll visit your site and work with you to design and install a bespoke system suited to your needs. We'll take care of the energy side of things so you can focus on the rest.

We're the experts in energy so you don't have to be.

THE BENEFITS OF LPG

LPG is an ideal fuel for off-the-grid homes and housing developments. End users will feel as connected to energy as they would on a mains supply.

What's more, it emits very little CO₂, it's efficient, and it's very cost effective. It also gives you the same flexibility as a mains gas supply. For instance, on LPG you can enjoy a controllable gas flame and use modern gas appliances.

And because tanks can be stored underground, it doesn't have to impact on the aesthetics of remote rural settings.

- > Controllable gas flame cooking
- > Highly efficient gas boilers
- > Modern, stylish appliances
- > Easy-to-access meters for hassle-free readings
- > Low set-up costs
- > Environmentally friendly fuel

LPG can also be used alongside renewable energy systems – which will reduce running costs even further.

LPG VS OIL

LPG is the smart fuel for housing developments because it's cleaner, greener and more cost effective than oil. It also offers these advantages:

- > It can be supplied in metered bulk storage, which means any number of houses can be supplied from one bulk storage installation
- > LPG boilers are generally cheaper to install, run and service than oil boilers
- > They're also more efficient and quiet
- > LPG emits less CO₂, NO_x and sulphur
- > Whilst oil storage tanks remain the responsibility of the user, we'll own, manage and maintain the LPG tanks on your site
- > With LPG there's no risk of costly or dangerous spillages
- > Storage options for LPG are flexible and include underground tanks
- > Oil installers do not have to be OFTEC registered, so there is no governing body like the Gas Safe Register (formerly CORGI) to protect your end users

WHY CHOOSE FLOGAS?

What would be the best possible service that you could receive from an off-grid energy provider? One that feels like a whole team of experts working for you around the clock; one that's tuned in to your every need; one that can connect your development to excellent energy.

WE'RE THE EXPERTS IN ENERGY SO YOU DON'T HAVE TO BE

We have 30 years' experience supplying LPG and alternative energy solutions to both domestic and commercial customers across the UK. Our customers include pubs and hotels, large-scale manufacturing companies, agricultural businesses, and, of course, off-the-grid homes and housing developments.

WE'LL KEEP YOU FEELING CONNECTED

Our excellent nationwide infrastructure means your home or development will always be well stocked and you won't need to worry about your energy supply running low. With us, your customers will always feel connected, and would never know they were off the grid.

THINK NOTHING OF IT

Our highly-trained staff are always on standby to help. From our friendly customer support team at our head office in Leicestershire, to our technicians, drivers and qualified engineers out on the field.

COMPETITIVE PRICING

We're one of Britain's leading suppliers of LPG which means that both you and your customers can expect competitive prices.

FREE SURVEY AND QUOTATION

Our engineers will come to your site to discuss an ideal LPG or renewable energy solution, and will find out what works best for you and your customers. We will provide expert project and design management so you have help every step of the way.

STORAGE DESIGN

We'll then provide all the detailed plans you'll need, demonstrating how and where the installation will take place.

PERFECT TIMING

Our expert team will install all necessary equipment around your development schedule, ensuring minimum disruption to your site – so you can simply focus on what you do best and leave the rest to us.

STORAGE OPTIONS

Every development is different. That's why our expert team will talk to you about what your needs are, and design an LPG installation that's best for you and your customers.

SINGLE BULK TANKS

For single, stand-alone houses, a bulk tank connected directly to the property offers an ideal energy supply for heating and cooking. The tank can sit above or below ground depending on space constraints and aesthetics.

METERED ESTATES

If your development is a little larger, a metered LPG supply from Flogas is the perfect solution. Any number of properties can be supplied from one central bank of tanks, and each property will be billed through their own meter – which can be read just like a mains gas meter.

Residents won't ever have to worry about ordering any gas and will feel as connected to energy as they would on the mains.

Tanks are available in a range of sizes to suit the supply need of your development, and can be installed above ground or hidden from view below.

COMMERCIAL

Business and industrial parks can also enjoy the benefits of having a Flogas LPG metered supply installed on their estate. So you can concentrate on what's important – running your business.

ADDED VALUE

TELEMETRY & TOP-UP SERVICE

Our LPG tanks are fitted with a system that automatically tells us when they need to be topped up, and we'll replenish your supply without you or your customers having to do a thing.

ABUNDANT SUPPLY

What's more, we have more filling plants across the country than our major competitors combined. Which means we're always close at hand to supply your LPG, so both you and your customers can rest easy knowing that whatever problems might come your way, your energy supply won't be one of them.

TESTING AND MAINTENANCE

We'll regularly test and maintain the tanks on your site. And for your peace of mind, we also have a 24-hour emergency team on call, who are always there to help.

HOW YOU'LL FEEL CONNECTED

1 We source our LPG from all of the UK's major oil refineries.

2 The LPG is delivered to our network of 32 terminals by our fleet of 90 tankers.

3 Our cylinders are filled at the terminal and prepared for delivery.

4 Our fleet of 250 vehicles work around the clock to ensure each and every customer has the supply they need – come rain, hail or shine.

5 We deliver cylinders straight to your door, or you can collect them when needed from one of our 41 national depots.

6 Or we turn up and refill your tank if you have one permanently installed at your business or on your property.

7 And so you never run out, we provide state-of-the-art telemetry units and top-up services where we calculate your gas usage and replenish your supply without you having to ask.

RENEWABLE ENERGY SOLUTIONS

Our expertise doesn't stop at LPG. We're also market leaders in renewable energy in the UK and can offer a range of cutting-edge systems to our customers:

- > Solar PV
- > Solar thermal
- > Biomass
- > Ground source heat pumps

REASONS TO CHOOSE FLOGAS RENEWABLES

Our renewable energy systems can be particularly beneficial when used alongside LPG. They also offer these excellent benefits:

- > Environmentally friendly
- > Reduce your carbon footprint
- > Produce minimal or no waste, pollution or noise
- > Require little additional energy
- > Eligible for government schemes and incentives
- > They can even pay for themselves within a few years
- > Some of the longest industry product warranties and maintenance guarantees
- > We'll provide the most cost-effective system based on your personal energy consumption
- > Most importantly, we'll provide you with expert project management and a seamless transition
