

HOTEL & LEISURE

**EXPERT ENERGY
FOR YOUR BUSINESS**

FEEL CONNECTED

WELCOME TO FLOGAS

We've been providing LPG energy solutions to hotels, restaurants and other leisure businesses for 30 years and are one of Europe's leading suppliers of LPG for both domestic and commercial uses.

LPG is a great way for hotel and leisure businesses to save on running costs and to reduce their carbon emissions. And it's a cleaner, greener, more cost-effective energy source than traditional fuels like oil.

If you run a hotel, restaurant, pub or leisure business and currently use oil for your energy, you may be paying over the odds and emitting more CO₂ than you have to. Our expert team can design a bespoke LPG installation that could reduce your energy bills by up to 40% and offer carbon savings of up to 50%*. What's more, we'll seamlessly switch you over without any disruption to your business.

If you're already using LPG with another supplier, we'll provide a service that reduces your energy bills, saves you stress and connects you to a team of energy experts.

But we do a lot more than keep customers connected to LPG – we're also the experts in renewable energy solutions. We're at the forefront of renewable energy technology and use some of the best products on the market.

Our goal is to take the hassle out of your energy supply, so you can focus on running a great business that your guests love. We're the experts in energy so you don't have to be.

THE BENEFITS OF LPG

We ensure our customers always feel connected to a great, reliable source of energy. LPG is an ideal fuel for many business applications, and is especially suited for businesses like yours.

HEATING

When it comes to heating your business, with LPG you'd never know you weren't on a mains supply.

- > Up to 40% cheaper than oil*
- > Low investment costs and quick payback on equipment
- > Automated delivery service – as if you were on the mains
- > Green fuel – up to 50% fewer emissions than oil*

CATERING

If you're serious about your food, you'll want to be able to cook on a controllable gas flame. LPG gives you all the flexibility in the kitchen that mains gas does.

- > Controllable gas flame for just the right heat
- > Easy lighting system
- > Clean burning and environmentally friendly fuel

* Figures demonstrate a typical level of savings against gas oil, but may vary dependent on oil grade used and burner efficiency.

ADDITIONAL USES OF LPG

The flexibility of LPG means that it's perfect not only for central heating and catering, but also for a number of other uses:

LPG IS THE PERFECT BACKUP FUEL IN CASE OF A POWER CUT, SO YOU'LL ALWAYS HAVE POWER

CAN BE USED IN CONJUNCTION WITH RENEWABLE ENERGY SOURCES TO MAXIMISE CARBON SAVINGS

THE PERFECT FUEL FOR HEATING SWIMMING POOLS

IDEAL FOR POWERING GOLF BUGGIES AND FLEET CARS

PERFECT FOR BARBECUES AND PATIO HEATERS ON THE TERRACE.

WHY CHOOSE FLOGAS?

What would be the best possible service that you could receive from an off-grid energy provider? One that feels like a whole team of experts working for you around the clock; one that's tuned in to your every need; one that makes you feel like you're not off the grid at all.

AN EXPERT SOLUTION TAILORED TO FIT

We know every business is different, which is why our expert team will survey your premises, free of charge, to work out what is needed. We'll then work with you to devise a project plan that provides an ideal installation.

ENERGY OPTIONS

Each business will have individual requirements when it comes to energy supply and storage. That's why we never force an 'off-the-shelf' solution on our customers. We'll talk to you about your needs and find the best solution possible – whether it's a switch from oil, bulk supply, cylinders, renewable energy or a combination.

WE'LL KEEP YOU FEELING CONNECTED

Our excellent nationwide infrastructure means you'll always be well stocked and won't need to worry about your energy supply running low. With us, you'll always feel connected so that you'd never know you were off the grid.

CURRENTLY ON OIL? WE'LL SWITCH YOU OVER SEAMLESSLY

If you're currently using oil to fuel your business, we'll switch you to LPG with absolutely no disruption to your energy supply, which means you can relax and focus on what you do best – running your business.

THINK NOTHING OF IT

Our highly-trained staff are always on standby to help. From our friendly customer support team at our head office in Leicestershire, to our technicians, drivers and qualified engineers out on the field.

AUTOMATED TOP-UP AND TELEMETRY SERVICE

As a busy business, we know you won't have much time for worrying about your gas supply. That's why we offer a reliable top-up scheme; our sophisticated telemetry units can fit on every tank, so we can estimate your usage and schedule deliveries without you ever having to place an order. It's just another part of the expert service we provide, and our way of ensuring you're always connected to great energy.

HOW YOU'LL FEEL CONNECTED

1 We source our LPG from all of the UK's major oil refineries.

2 The LPG is delivered to our network of 32 terminals by our fleet of 90 tankers.

3 Our cylinders are filled at the terminal and prepared for delivery.

4 Our fleet of 250 vehicles work around the clock to ensure each and every customer has the supply they need – come rain, hail or shine.

5 We deliver cylinders straight to your door, or you can collect them when needed from one of our 41 national depots.

6 Or we turn up and refill your tank if you have one permanently installed at your business or on your property.

7 And so you never run out, we provide state-of-the-art telemetry units and top-up services where we calculate your gas usage and replenish your supply without you having to ask.

TOMORROW'S ENERGY TODAY

We're not just the experts in LPG. We're at the forefront of the renewable energy sector and offer cutting-edge solutions – from solar PV and solar thermal systems, to biomass installations and ground source heat pumps.

Flogas Renewables can help your business save money and get greener by reducing your carbon footprint. We also offer the most efficient, tried-and-tested renewable energy technologies available in the market today. And by choosing us for a renewable energy solution, you'll also enjoy these great benefits:

- > Significantly decrease your energy bills
- > Systems can pay for themselves within three years
- > No deposit or upfront payment required
- > Receive money back via government schemes and incentives (Renewable Heat Incentive and Feed-in Tariff)
- > Enjoy a hassle-free service – we'll take care of everything
- > We work out the maximum cost saving for you
- > Most importantly, we'll provide you with expert project management and a seamless transition from your existing system
