

# LPG FOR FORKLIFT TRUCKS

A SMARTER SOLUTION  
TO FUEL YOUR BUSINESS

FEEL CONNECTED

## WELCOME TO FLOGAS

We've been providing LPG energy solutions to businesses for 30 years and are one of the UK's leading suppliers of LPG for both commercial and domestic uses.

LPG for forklift trucks is cleaner, cheaper, and more flexible than diesel. It has great benefits over electricity, too. For industrial customers it's also a great way to heat premises and provide energy for a whole range of industrial processes.

If you're already using LPG with another supplier, we'll provide a service that reduces your energy bills, saves you stress and connects you to a team of energy experts.

What's more, Flogas will take the hassle out of your LPG supply, by providing the most suitable solution, and ensuring your tanks are topped up without you having to do a thing. Which means you can focus on what you do best – running a great, productive business.

**We're the experts in energy so you don't have to be.**

# THE BENEFITS OF LPG

More and more businesses are switching to LPG for their forklift trucks. And we supply all sizes of companies – from small operations to huge multinationals.

## IT'S THE IDEAL INDUSTRY FUEL.

If you currently run your forklift trucks on diesel or electricity, you may be paying over the odds and constrained by certain limitations. There are many benefits that LPG could bring to your business – switching today can save you money and help increase your business's efficiency.

### LOWER UPFRONT COSTS

With LPG you won't have to purchase any costly recharging equipment, batteries, or pay for battery disposal. And an LPG forklift truck will typically cost less than the diesel equivalent so your business will start saving right from the start.

### LOWER CO<sub>2</sub> EMISSIONS

LPG produces less CO<sub>2</sub> than diesel. This means it will be easier for your business to meet government targets.

### CLEANER

Unlike diesel, LPG won't leave soot over the products you handle. It's therefore suitable for businesses moving food, pharmaceuticals, clothes and textiles. You'll also breathe easier as it produces fewer PM10 particles, which have been linked to respiratory problems. And because it's cleaner, your LPG engine will generally last longer than a diesel one.

### FASTER REFUELLING

Batteries take time to recharge, which can mean unproductive downtime for your business. Refuelling your forklift trucks with LPG is quick and easy. This means you can keep productivity high and work around the clock if needed.

#### **CONSISTENT AND RELIABLE**

Electricity can be unreliable, especially in the winter months when supply is susceptible to power cuts. LPG offers consistent supply all year round. So you won't need to worry about losing precious hours of work to inclement weather.

#### **POWERFUL**

The performance of LPG forklift trucks exceeds those of their electric and diesel rivals. This is because they typically have a better power-to-weight ratio and more responsive engines. You can therefore relax knowing your forklift truck can tackle difficult tasks and can meet the ever-increasing demands of your business.

#### **FLEXIBLE**

Whilst diesel can't be used indoors and electric forklift trucks are unsuitable for prolonged outdoor use, LPG forklift trucks are ideal for both indoors and out. This versatility means less stress for you, and for your staff – who will only need to be trained to use one type of vehicle for the warehouse and the yard.

#### **QUIET**

LPG engines are significantly quieter than diesel ones. This results in a work environment that's more conducive to concentration, and perhaps, even, productivity. It also results in a reduction in environmental noise pollution – important if your business is in a built-up area and especially if you operate 24 hours a day.

## WHY CHOOSE FLOGAS FOR YOUR LPG?

### WE'RE THE EXPERTS IN ENERGY SO YOU DON'T HAVE TO BE

We've been providing alternative energy solutions to commercial and domestic customers in the UK since 1984 and have a team of experts ready to design and install the best LPG system for your needs. That's why we never force an 'off-the-shelf' solution on our customers.

#### WE'LL KEEP YOU FEELING CONNECTED

Our excellent nationwide infrastructure and automated top-up and telemetry service means you'll always have the LPG you need.

#### TURNKEY INSTALLATION

We offer all our customers a turnkey design and installation service and will take care of all the details so you don't have to.

#### WE'LL SHARE OUR EXPERTISE

What's more, we'll ensure all your staff are trained in the use of LPG, including refuelling and safe handling.

#### THINK NOTHING OF IT

Our highly-trained staff are always on standby to help. From our friendly customer support team at our head office in Leicestershire, to our technicians, drivers and qualified engineers out in the field.

#### COMPETITIVE PRICES

Because we're market leaders in LPG supply, you can be guaranteed competitive prices.

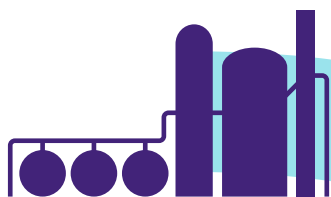

#### CUTTING-EDGE TECHNOLOGY

The technology we use is at the cutting edge of the alternative energy sector. And our staff are experts in its use and installation.

#### YOU'RE IN SAFE HANDS

All of these reasons mean you can relax knowing you're getting a product and service that will add value to your business.

# WE'LL KEEP YOU FEELING CONNECTED WITH OUR NATIONWIDE DISTRIBUTION NETWORK

**1** We source our LPG from all of the UK's major oil refineries.

**2** The LPG is delivered to our network of 32 terminals by our fleet of 90 tankers.

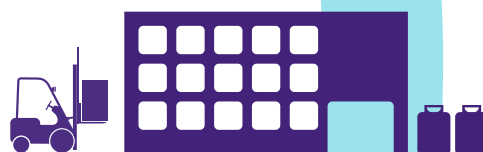

**3** Our cylinders are filled at the terminal and prepared for delivery.

**4** Our fleet of 250 vehicles work around the clock to ensure each and every customer has the supply they need – come rain, hail or shine.

**5** We deliver cylinders straight to your door, or you can collect them when needed from one of our 41 national depots.

**6** Or we turn up and refill your tank if you have one permanently installed at your business or on your property.

**7** And so you never run out, we provide state-of-the-art telemetry units and top-up services where we calculate your gas usage and replenish your supply without you having to ask.

# SUPPLY OPTIONS

We offer a choice of supply options to suit all sizes of business. When you choose Flogas for your LPG, our energy experts will talk to you about your requirements and find a storage and supply solution that suits you best.

## BULK SUPPLY WITH TELEMETRY

This is by far the most convenient option for larger businesses. We'll install a tank or tanks on your premises, monitor your use remotely, and keep your supply topped up without you having to do a thing.

## 18KG CYLINDERS

These are great for smaller businesses who don't require the volume of bulk storage. They're easy to handle and can be changed in a matter of minutes.

## SMALLER CYLINDERS

We also offer a choice of smaller cylinders, which give you great flexibility.
