

HOLIDAY & HOME PARKS

CLEAN, GREEN,
COST EFFECTIVE FUEL

FEEL CONNECTED

WELCOME TO FLOGAS

We've been providing LPG energy solutions to holiday and home park businesses for 30 years and are one of the UK's leading suppliers of LPG for both domestic and commercial uses.

As you may already know, LPG is a great way for holiday and home park businesses to save on running costs, reduce their carbon emissions, and it's an ideal fuel for cooking and heating.

If you run a holiday or home park and are currently using LPG from another supplier, you could be paying over the odds. Switching to us could save you money, stress and make you feel as connected to energy as you would on mains gas.

Our expert engineers can come to your park, free of charge, to talk about your needs – and can design a bespoke installation that's best for your business.

Our goal is to take the hassle out of your energy supply, so you can focus on running a park that your residents and guests love. We're the experts in energy so you don't have to be.

THE BENEFITS OF LPG

We ensure our customers always feel connected to a reliable source of energy. LPG is an ideal fuel for many business applications, and is especially suited for the holiday and home park industry.

- > The perfect alternative to mains gas
- > Great for real gas flame cooking and heating
- > Supply can be flexible to suit your business's needs

FLOGAS - YOUR EXPERTS IN ENERGY

What would be the best possible service that you could receive from an off-grid energy provider? One that feels like a whole team of experts working for you around the clock; one that's tuned in to your every need; one that makes you feel like you're not off the grid at all.

We know every park is different, which is why as part of the service we'll survey each of your sites free of charge to work out what is needed. As your business has expanded over the years, you may find that you no longer have the most efficient energy solution to match your changing requirements.

Flogas will take care of this, with our expert technical team assessing your needs, and working with you to devise a project plan that provides the perfect installation. You'll be provided with detailed technical drawings and explanations as to why we believe our plans will improve your business and save you money.

If you do decide to switch to Flogas, then our own engineering team will deal with all the necessary work quickly and efficiently. And don't worry, we know you can't have any major disruptions to your park; so we'll work to your timescales, completing all work during your short window of closure.

WHY CHOOSE FLOGAS FOR YOUR LPG?

WE'RE THE EXPERTS IN ENERGY SO YOU DON'T HAVE TO BE

We have 30 years' experience supplying LPG to both domestic and commercial customers around the UK. Our customers include off-the-grid households, pubs and hotels, large-scale manufacturing companies, agricultural businesses, and, of course, holiday and home parks.

WE'VE GOT 25 YEARS EXPERIENCE IN THE HOLIDAY AND HOME PARK INDUSTRY

We're members of the BH&HPA and NCC and have been working alongside some of the biggest names in the industry for over 25 years. This means we're on familiar turf, and have a huge store of knowledge and expertise that will benefit your business.

WE'LL KEEP YOU FEELING CONNECTED

Our excellent nationwide infrastructure means you'll always be well stocked and won't need to worry about your energy supply running low. With us, you'll always feel connected so that you'd never know you were off the grid.

AUTOMATED TOP-UP AND TELEMETRY SERVICE

As a busy business, we know you won't have much time for worrying about your gas supply. That's why we offer a reliable top-up scheme; our sophisticated telemetry units can fit on every tank, so we can monitor your usage accurately and schedule deliveries without you ever having to place an order. It's just another part of the expert service we provide, and our way of ensuring you're always connected to great energy.

THINK NOTHING OF IT

Our highly-trained staff are always on standby to help. From our friendly customer support team at our head office in Leicestershire, to our technicians, drivers and qualified engineers out in the field.

FLEXIBLE PRICING

We can help tailor a pricing package that suits your needs. For instance, if you'd like to upgrade your site with cylinder covers but want to avoid the one-off cost of purchasing them, we can build this cost in to the price of your supply.

This approach, we believe, is unique in the industry and makes us the ideal expert energy partner.

SUPPLY OPTIONS

Each park will have individual requirements when it comes to energy supply and storage. That's why we never force an 'off-the-shelf' solution on our customers. We'll talk to you about your needs and find the best solution possible – whether it involves cylinders, bulk supply or a combination of both.

CYLINDERS

Our 47kg and 19kg propane cylinders offer an ideal solution for the heating and cooking requirements of your residents and guests. They are particularly popular where space is a premium and larger bulk installations are not possible. Cylinders will commonly be fitted in pairs, with changeover kits available to ensure continuity of supply. Cylinder shelters can also be provided to help with the aesthetics of your park.

BULK

If space is less of a concern, or your volume higher, Flogas can provide LPG in bulk tanks. Depending on your needs, we can install your tank or tanks above or below ground. Whichever solution is best for you, we'll arrange and undertake all the necessary work to get them in place and up and running.

METERED ESTATE

Another option we can provide is a metered supply – where gas is piped to individual homes from a central tank or tanks. We can come to your site, free of charge, to assess your needs and find a solution that suits you best – whether it's installing a new metered supply, or upgrading an existing system.

FEEL CONNECTED VIA OUR GREAT NATIONAL DELIVERY NETWORK

1 We source our LPG from all of the UK's major oil refineries.

2 The LPG is delivered to our network of 32 terminals by our fleet of 90 tankers.

3 Our cylinders are filled at the terminal and prepared for delivery.

4 Our fleet of 250 vehicles work around the clock to ensure each and every customer has the supply they need – come rain, hail or shine.

5 We deliver cylinders straight to your door, or you can collect them when needed from one of our 41 national depots.

6 Or we turn up and refill your tank if you have one permanently installed at your business or on your property.

7 And so you never run out, we provide state-of-the-art telemetry units and top-up services where we calculate your gas usage and replenish your supply without you having to ask.
