

CLEANING, SEALING & AFTERCARE

PORCELAIN TILE PROTECTOR TECHNICAL DATA SHEET

REF: 39/5/1 MARCH 2019

LTP PORCELAIN TILE PROTECTOR

Water based pre-grout treatment.

Interior & exterior use

For use on all types of textured porcelain tile surfaces. Helps with grout and jointing compound release. A further coat can be applied after grouting, which will help with the removal of stains from organic matter.

Directions for use

Preparation:

Ensure surface to be treated is completely clean, dry and free from dirt, grime, cement and grout. If necessary, first wash surfaces with a dilute solution of LTP Grimex 1:5 and white pad. Rinse well to remove residues and leave to dry

Application: Shake bottle before use. Before grouting apply generously and evenly using foam roller or paint brush across the surface of the tile. Leave to dry naturally. Leave to cure for a minimum of 4 hours before grouting or pointing. Once pointing is dry and all residues have been removed, apply a further coat of protector making sure to cover the joints as well.

Do not use a sprayer to apply due to risk of aspiration.

Coverage

Lower porosity surfaces 1 ltr 30 m² 5 ltr 150 m²

Aftercare

Routinely sweep and wash the floor. Clean walls, floors and work surfaces with **LTP Porcelain Cleaner**

Other

Hard to remove dried on cement stains can be removed using **LTP Grout Stain Remover or LTP Cement, Grout & Salt residue remover**. Hard to remove stains from jointing compounds can be removed using **LTP Solvex**. Empty containers are recyclable. Active ingredients are water soluble and inert once cured. Do not use in temperatures under 5°C or over 25°C. Clean application tools and brushes with water after use.

Storage information

Store in a cool, dry, frost-free environment. Store locked up.

Shelf Life – Up to 2 years for un-opened containers.

Health, Safety & Environmental
